## Customer Reviews

Michelin maps are reliable, updated and easy to read. I find their coverage of Africa better than other options. Boundaries are updated to the latest international agreements (or disagreements as a matter of fact). The roads layer seems to reflect what actually happens on the ground, given the feedback I receive. I would certainly recommend it to travelers or fellow cartographers like me.

Came in very handy during our visit to South Africa last year - accurate as far as we could tell. Good thing to have if you're driving around the countryside.

great detail. good map

Thanks

The map is colorful and the roads and highways cover most of South Africa which was my interest .

However I was planning to use the map for navigating the roads, but the roads have no identification by name or number that I can find on the map and it will be of limited use to me. Never having used a Michelin map before, I was disappointed that it wasn't like a AAA map of roads in the United States. Live and learn.

Michelin Map of Africa, Central & South is just great. It is filled with a lot of information of various locations and parks. I bought to make a lampshade and this map is perfect.

Excellent

We needed a closer, more detailed map of the area we were visiting at the Serengeti National Park and environs.
