# Global Orthopedics: Caring For Musculoskeletal Conditions And Injuries In Austere Settings

## Synopsis

Global Orthopedics: Caring for Musculoskeletal Conditions and Injuries in Austere Settings was conceived and written to be a unique reference for surgeons working in resource-limited environments. The first sections provide historical background, global public health perspectives of orthopedics, the role of culture, and a broad discussion of clinical topics that orthopedic surgeons rarely deal with in high-resource settings but that affect orthopedic care. Adult and pediatric trauma are presented in an anatomical format for easy reference, with a focus on the natural history and the best treatment methods within existing limitations. The chapters on musculoskeletal infections provide a focused discussion about these common debilitating conditions that is unavailable in any other single modern text. The non-infectious pediatric conditions section has been written for the non-specialist to handle selected developmental and early childhood orthopedic problems commonly seen in low-resource settings. Detailed chapters on reconstruction surgery, tumor management, amputations, and the orthopedic needs in the face of conflicts and natural disasters round out the text.

## Book Information

Paperback: 525 pages

Publisher: Springer; 2014 edition (April 19, 2014)

Language: English

ISBN-10: 1461415772

ISBN-13: 978-1461415770

Product Dimensions: 7 x 1.3 x 9.9 inches

Shipping Weight: 2.8 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 2 customer reviews

Best Sellers Rank: #2,761,963 in Books (See Top 100 in Books) #59 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Tropical Medicine #100 in Books > Medical Books > Medicine > Internal Medicine > Infectious Disease > Tropical Medicine #1036 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Orthopedics

## Customer Reviews

Global Orthopedics: Caring for Musculoskeletal Conditions and Injuries in Austere Settings was conceived and written to be a unique reference for surgeons working in resource-limited environments. The first sections provide historical background, global public health perspectives of orthopedics, the role of culture, and a broad discussion of non-surgical and non-orthopedic clinical

topics that are rarely encountered in high-resource settings but that affect orthopedic care. Adult and pediatric trauma are presented in an anatomical format for easy reference, with a focus on the natural history and the best treatment methods within existing limitations. The chapters on musculoskeletal infections provide a wealth of knowledge about these common debilitating conditions that is unavailable in any other single modern text. The non-infectious pediatric conditions section has been written for the non-specialist to handle selected developmental and early childhood orthopedic problems commonly seen in low-resource settings. Detailed chapters on reconstruction surgery, tumor management, amputations, and the orthopedic needs in the face of conflicts and natural disasters round out the text.

Richard A. Gosselin, MD, MPH, MSc, FRCS(c), Co-Director, Institute for Global Orthopedics and Traumatology, Department of Orthopedic Surgery, University of California San Francisco, San Francisco, CA, USA  
David A. Spiegel, MD, Associate Professor of Orthopedic Surgery, University of Pennsylvania School of Medicine, Honorary Consultant in Orthopedics, Hospital and Rehabilitation Centre for Disabled Children, Benepa, Nepal, Division of Orthopedic Surgery, Children's Hospital of Philadelphia, Philadelphia, PA, USA  
Michelle Foltz, MD, Columbus, MT, USA

Should be required reading for anyone venturing into the realm of orthopedic care in LMIC. Lots of tips for the experienced and novice alike.

This book will fulfill a long felt need for information and profound practical hints, for the management of the common serious conditions (largely traumatic) that afflict the Emergency Rooms of 3/4 of the world's hospitals. This book should be much more useful in the context of where it is directed to, than all the advanced Journals of Modern Orthopaedics. Previously the most valuable books were those of 70 years ago, such as Charnley's "Closed Treatment of Common Fractures" or Crawford Adams' "Outline of Fractures". But this book has been expected to be right up to date with the scene which is relevant today, without being based on manufactured implants or unobtainable scanners. I would like to receive ONE Sample copy for more reviews and comments. Prof Dr Ram K Shah Nepal Medical College Teaching Hospital Kathmandu, Nepal
