Customer Reviews

This is definitely a supplementary book to go along with an anatomy and physiology course. If you are just interested in this book for your own personal interest it is good too. It certainly does not cover everything and does not go into super detail about the topics but it does help with the retention of general ideas and provides a nice break to intense studying if you are looking for a light relaxing way to integrate what you have studied.

Looks Great! Book packaged perfectly with not even a corner bent. My professor for this upcoming

semester of A&P suggested this & said it would be relevant to both A&P I & II. Sounds like a winner to me. Thanks so much!

This book helped to enable me to pass my state, national testing for a massage therapist on the first try. Yeah! The size of the drawings was a big help in identifying each muscle, joint etc. I was able to separate each joint, nerve etc by coloring them each a different color. Worked well!

I thought I would order this and get a head start for next august 2016 when taking this class. It's been also a great stress reliever to relax and color.

This is a very fun way to study. It is interactive, and very detailed. I love to color, but it is a big plus that I can color but also learn at the same time. It also was extremely fast to arrive on my doorstep.

I decided to get this and color in it alongside my A&P course as reinforcement of the material I am learning. What a great way to learn but still feel like I am having a brain break.

It had more anatomy content than physiology content, but overall it was pretty good. The pictures were large and easy to color for the most part.

This product had some great additional information along with the pictures. So, I am very happy with it :)
