Paul Hewitt pioneered the conceptual approach to teaching at City College of San Francisco, with guest spots at the University of California at both the Berkeley and Santa Cruz campuses, and the University of Hawaii at both the Manoa and Hilo campuses. He also taught his physics course for 20 years at the Exploratorium in San Francisco, which honored him with its Lifetime Achievement Award in 2000. His books are translated in 12 languages and used worldwide.

Arrived on time and was the right book. Obviously it's a rental so I wasn't expecting a perfect book, like the cover is bent and there is notes and writing from previous owners, but other than that, it's good

Rented this for my daughters physics class. College books are ridiculously expensive so this has been a wonderful easy and affordable alternative for us.

It is very good book for my class physics . Thank you. God bless you.

This book was required for our daughter's masters program and it was very nice to be able to get it here for about eighty percent less than her local book store wanted... yes, about one fifth the cost. Excellent. If required for you, compare and save here too plus get it quickly like we did!

Still too costly, despite being significantly cheaper than the printed version.

I needed it for class. Book was in good shape. Just what I needed.

Book is helpful when taking the college physics class. Good at explaining and haven't had to use other resources for the class.

Awesome quality and timely as expected
