Tracks, Scats And Signs (Take Along Guides)

Synopsis

Become a nature detective with this illustrative, engaging and fun Take-Along-Guide. You may not know where to look, or what to look for, but animal signs are everywhere and this guide will help you learn how to read them. You'll learn how to spot and identify common clues that 17 wildlife species leave behind in the woods, in the fields and along ponds.

Age Range: 7 - 10 years

Grade Level: 2 - 5

Customer Reviews

I bought this for my 8 year old great nephew, who is fascinated by anything poop related... He loves the pictures and information and can't wait until he can find some of the animal scat in his adventures out doors. The illustrations in this series are just beautiful. I highly recommend.

Very well written with beautiful pictures. My 7 year old granddaughter is an outdoor princess who isn't satisfied with merely seeing things - she wants to know what she's seeing & some information about it. This entire series of books does just that. Makes identifying very easy & gives factual information in just the right amount for elementary age children . Highly recommend!

The whole series are wonderful for my preschooler... and me to learn from

Grandson enjoyed receiving this book and it contains information that was appropriate to a youngster of 9 years old. We went on a nature hike where he took the book with him.

Another wonderful "Take Along Guide" for young and old alike, especially for grandparents and their grandkids. What seven year old boy doesn't laugh at the thought looking at animal poop in the woods! Brings back wonderful memories going back sixty years as I walked along French Creek in Avon, Ohio, especially on an early morn winter snow. Hopefully, I will create some similar happy moments for the Brody Bear.

Good Book

GOD BLESS

We purchased this book (and several others like it, but different topics) for our grandchildren. My husband and I both looked at them when they came and we loved them ourselves! The pictures are great and the print is the perfect size. I think it gives enough information, but not too much information. It's not so long that the kids will get bored before they are finished reading it.
