Dougal Dixon graduated from the University of St Andrews with a Master of Science degree in 1972. He began his career as a geological consultant, nurturing a special interest in fossils and evolution. As a practical geologist, he was involved in excavating a dinosaur-rich site in Jurassic rocks at Durlston on the Dorset coast in 1987. He is now a full-time writer specializing in earth sciences and has written many children's books and encyclopedias with a special interest in dinosaurs.

This was a gift for my grandson. He loves dinosaurs, and he loved this book. Full of illustrations.
Word, word, word, word,

My son loves this

My 9Yr old is a dinosaur fanatic. We got this for his birthday. He uses this as his reference. Great

book with lots of info. Depends on the child as to what age to buy for. Its more teenage/adult reading. Would recommend and buy again. Fast shipping and perfect condition.

Grandson just loved it. He found lots of information that he did not already know

Extremely thorough and interesting. Illustrations are wonderful. The book does an excellent job of placing the various types of dinosaurs in the ecological and geological contexts. Well worth the price.

Great book for kids and adults! I was a dinosaur freak as a kid and still am at 31. One of the best out there in my opinion. Great illustrations!

My teen loves this book!

Was another birthday present for a 7 year old. I enjoyed reading it until I had to wrap it.
