Textbook Of Clinical Gastroenterology And Hepatology

Synopsis

Whereas other textbooks mix a clinical approach with large amounts of the basic science of gastroenterology, this book concentrates on providing practicing gastroenterologists with 100% clinically focused, evidence-based chapters on how to correctly diagnosis and treat all disorders of the digestive tract. Once again, the book is divided into 4 clear parts: Symptoms, Syndromes and Scenarios; Diseases of the Gut and Liver; Primer of Diagnostic Methods; and Primer of Treatments. An accompanying website contains more than 85 high-definition surgical videos of diagnostic and therapeutic endoscopic procedures, 300 MCQs written to mirror the American College of Gastroenterology postgraduate course exams, more than 35 management protocol charts for different diseases, and 850+ illustrations for use in scientific presentations.

Book Information

Hardcover: 1272 pages

Publisher: Wiley-Blackwell; 2 edition (May 21, 2012)

Professor Francis Chan is Professor of Medicine and

Therapeutics at The Chinese University of Hong Kong (CUHK) and an honorary consultant physician at the Prince of Wales Hospital (PWH).

Very good thanks

This is solid clinical knowledge, which is provided to Gastroenterology residents, and to specialists as well, by a great team of Doctors!! I could only wish for an amendment of the Kindle edition, so that it could resemble more like the real Textbook itself.

A book that a fellow should read until the third year of training. It can be used as reference textbook, and it is easily read and with many and informative figures and tables. The MCQ that follow the book are of great clinical interest. I absolutely recommend it.
