Customer Reviews

Recently I began to be interested in making soap. The children keep goats at their grandmother's house and I was thinking it might be interesting to attempt goat's milk soap. This is a boxed set of 3 books concerning the hobby and/or business of making soap. It gives a fairly comprehensive explanation of the various processes, and does a good job reinforcing the dangers of working with lye. The 1st and 3rd books struck me as fairly well written, however book 2 could have benefited from an editor. It gave the impression that the author's first language was not English, and it stated repeatedly what a great hobby soap-making can be, as if trying to persuade the reader to attempt it, rather than instruct. The effect of reading all 3 books in one sitting (which only took an hour), was that many bits of information repeated. After the first dire warning about lye, for example, I found my eyes skimming further sections regarding it. However, both books 1 and 2 included recipes for soap, which was my main interest in the download. I tried

one recipe from the book before coming back to make my review. Because I'm a beginner, and it warned several times about the dangers, I chose a recipe that used a glycerin soap base rather than a fully homemade recipe that required lye. It seemed the safest way to begin. I made the small, one-use blue sugar scrub soap from book 2, because I had most of the ingredients on hand. For a scent I couldn't find the recommended raspberry, but I enjoy honey-almond, so I went with that. I used an old ice cube tray to set the soap. The actual process was quite easy, and the instructions were simple to follow, which I appreciated. I let the soap harden for about 2 hours. It came out of the tray easily, with only one piece that sort of fell apart in the process. I immediately used one to wash my hands, to see how it felt - a good use for the damaged piece. The sugar scrubbed effectively, but I think I over-did it on the scent. My hands smell great, but as I was washing, it was a bit overwhelming. The recipe didn't tell me exactly how much scent to add, but the text of the book had previously mentioned that ever essential oil or fragrance oil is different and it would take some trial and error to discover the correct amounts for my favorite oils. Although it felt a bit greasy while I was washing, my hands didn't continue feeling greasy afterwards. I imagine that oil is necessary, so that you don't damage your skin with the abrasive sugar. All three books recommended a plastic wrap for storing soaps. Since mine contained both a glycerin base AND grapeseed oil, that seemed wise, so I wrapped each soap individually. I found one cute, tiny ribbon in my sewing kit, which I would have loved to use for all of them. But I didn't have any more. Instead, I found some extra lavender ribbon lying around and completed the set with those. Overall, very happy with this book set and the first recipe I tried. Looking forward to trying another after gathering a few more ingredients. I received this product at no charge in exchange for my honest, unbiased opinion.

For as long as I've been receiving these homemade bars of soap, I've wondered in awe as to their creation. I envisioned a huge, kitchen slash mad scientist laboratory and now I think that I might have been close to the truth. The author has laid out the process neatly and in an organized manner. Also included are recipes, DO NOT DO THESE and different soap making methods. It's pretty sweet. I still don't know if in actuality, this is easily done. But, it is doable! It seems that I'd just have to gather up the needed ingredients and give it a test run! I'd enjoy that though. Cool book. DISCLOSURE: While I did receive this or these item(s) for free or at an extreme discount in consideration of this review, my opinions still belong to me and are not and never have been, for sale to anyone.

This is a great set of digital books to learn how to make unique simple soaps from scratch. I've always wanted to learn and I couldn't believe how simple it is. This book is very detailed and explains several different ways to create soaps from home made recipes in a simple easy to understand chapters. All you have to do is find the right method for you. This soap making digital book was offered to me for free in exchange for an honest review. I'm really happy with the books and will be referring to them when I start making my own soaps for my family. Makes a great read for those interested in making their own soap for personal use and for occasional gifts. Written in a great simple manner and a great read to gain new skills.

Soap Making is always a very good hobby that requires art, inspiration and certain knowledge for preparation, formulation and processing. This book contains reliable information about the history of soap, about soap making, about techniques and formulations that you can do by yourself with not so complicated tools or processes. There is information about what active ingredients you can add to a soap formula in order to get a heavier or lighter, softer or harder, strong or light smell, healing purposes or decorative purposes, and many more features. Certainly, as in any other manufacturing processes you must observe certain precautions and follow certain rules in order to perform the process without harming yourself or others. With this book you can create your own formulas too and you can consider to make your own soaps for whatever reason you may have and also as gift for your loved ones.
