Customer Reviews

Harry Fraser has been responsible for the craft ceramic activities of several leading companies and is the former managing director of Potclays, one the UK's largest pottery suppliers.

Everything you ever needed or wanted to know about Ceramics is in here.

This book provides good practical advise on all phases of pottery making specifically on shrinkage and crack formation, and firing.

Every ceramic artist should have this in their reference collection. I use it all the time and keep it as a reference for my students.

ok

I first bought this book in 1992 and its been one of the most used texts for my practice. When I

started slipcasting in the early 80s there were few resources to help source and solve issues I had with casting. Harry's book was invaluable when I finally found a copy. Its layout and illustrations makes it very easy to find the answers to all sorts of problems. The language is also very understandable and not too technical for beginners to understand. Its the one book I constantly recommend to fellow potters and students as one of the most important reference books to have .
